## Our Story

Our academy is dedicated to supporting youth media, we have been able to offer a variety of professional opportunities to our students. The Multimedia Academy helps students transform their ideas into media work and become active participants in society, owners of their creative work and provides a meaningful path to college and careers in the media arts. The work is reflective, innovative and representative of the diversity of young people who are eager to tell their own stories. Students' films have screened at the local, state, national, International and twice at The United Nations in New York City. Students from this program have been recipients of the Adobe Scholarship and finalists and winners of the film awards for the past eight years. The Multimedia Academy continue to inspire and support students in developing and nurturing their creative spirit, and connecting youth both to their local community and to a global community of young creators.
